Our Learning

Our topic and information on maths and English will be in the news letter this week.

All the classes have been following a continuous provision approach to learning.

In art, the children have been creating and designing their own shells to share. They have created cones from A4 paper and using different water colours to design their shells.

Within social skills, the children have been encouraged to join group play with sensory materials. Using timers, the children have had to wait their turns and share with their peers.

The children enjoyed another assembly, they were able to show case their hard work during this week and congratulate one another.
